52 TEXT

'NC 252' 519. Oval hut, 24ft. by 15ft., with remains of a crude hearth against one wall.'
 (7.44m) (4.68m) (OSRI:E.S:9.6.1977) (1)

'At NC 2527 5192, in a sheltered S-facing position high up in the NW shoulder of a hill, are the denuded remains of a hut circle set into the slope. The wall is tumbled and partially heather covered, but occasional slabs of inner facing are discernable, indicating an approximate internal diameter of 5.5m.; an entrance position would seem to be from the south. In the level interior, a pile of loose stones against the NW arc, the alleged 'crude hearth', is probably a collapsed lambing pen or similar. The environs of the hut circle is heather-cropped, generally stone-free ground, with four or five stone clearance heaps visible (see also HNC25SE 004) Surveyed at 1:10,000.'
 (OSFI:J.M:5.6.1980)
