"A": NC 81972732 ; 'B': NC 82052730; 'C': NC 82022728. Hut Circles." (1)

"Discovered during field investigations on a SW facing slope are the remains of three hut circles." (OSFI:WJ:22.5.1961)

"Huts 'A' and 'B' are similar, being of small size with slight, sometimes indistinct walls. The walls of 'A' appear to be about 1.2m wide. The huts measure internally 7.2m and 6.0m in diameter respectively. 'C' is of a stronger construction 10.0m in diameter within a wall spread to 2.5m. Abutting the east side, are the remains of a rectangular structure, 5.0m by 2.5m and 0.1m high, associated with the adjacent depopulated township. From its north end a slight earth and stone bank runs round a modern sheepfold to the rectangular fold at NC 82062719. No clear traces of contemporary cultivation were seen in the area, partially overlaid by early modern ploughing." (OSFI:JB:2.1.1977)
