52 TEXT

"(A: NC 92372029, B: NC 92402029, NC 92272036 & NC 92282035) Hut Circles." (1).

"A settlement of possibly 4 hut circles accompanied by field clearance mounds. 'The mounds are said to have been investigated for cists but nothing, has been found in them.'" (2).

"There are 2 hut circles (A-B) and an associated field system in a high, fairly level situation open to the S. Of the features at NC 92272036 and NC 92282035 the first is natural; the second, a low circular band 1.0m broad of heather-covered rubble enclosing a not particularly levelled area of 4.0m diameter, is certainly not a hut. It may be a disturbed stone clearance heap. The two huts are heather-covered and much reduced, and both have an entrance from the S. 'A' is 6.5m diameter inside a wall spread to 1.5m. 'B' is 7.5m diameter internally; the wall is of indeterminate dimension.

(over).

52. The field system, about 10 hectares in area, is mainly distinguished by stone clearance heaps, numerous along its E face but sporadic elsewhere. There are occasional obscure lynchets, and in the S extent what appear to be one or two wasted field banks. Measurable cultivation plots are not discernible."  
(OSFI:JM:7.12.1976).
