

Rev. DAVID E. STANGER

David started dowsing over 30 years ago when a municipal water works foreman started looking for a 4" steel water pipe close to an old hydrant. The foreman had "L" rods with handles 10" long and the horizontal end at least 18" long. They were made out of copper electrical wire and had been used for high voltage service. The foreman stated that these were the only ones that would work; for him this was a true statement. David's first pair were similar and a few wells were located.

In September 1986 he attended the **AMERICAN SOCIETY OF DOWSERS** dowsing school, a two day affair, and was quickly shown that many other things could be used for dowsing. The next winter David took his son to a healing clinic in Montréal, PQ. and was told by Rev. Sharon Forrest that he was a healer and hasn't been able to stop since.

In 1988/9 David was one of the founding members of the **CANADIAN SOCIETY OF DOWSERS** and is a past president of the Association.

David currently does water dowsing. He is also an ordained priest "After the Order of Melchizadek". Almost all work is now of a spiritual nature, from the removal of discarnates, or entities to the clearing of blockages from "conception to present day", and clearing houses of earth energies harmful to humans. More recently "Spirit" has directed him in ways to prepare people for all the changes overtaking Mother Earth. Most of David's work is done on the telephone, but he particularly enjoys working directly with individuals or groups. Clients extend across Canada and into the USA as far as Texas, California, and Hawaii.
