2 TEXT

"At NG 2345 , on the banks of a small stream on the N side of the Osdale Burn, at a height of about 650 ft (198.4m) OD., there are about 13 ruined shielings. They are of double-cell type, and show mainly as green mounds with hollows in the centre, some with dry-stone walling visible." (OSFI:CFW:9.5.1961)
