47 TEXT

"A stone spindle-whorl from Braeside, Glenelg, was presented by D. Maclure of Glenelg. to the NMAS. 1957-58. (I)."

"This spindle whorl was found by Mr. Maclure close by the burn at NG 87171926 whilst lifting stones. He found a further 24 in roughly the same place under similar circumstances this year and has retained eight of them. They are of soapstone, measuring 1 1/2" in diameter and 1/2" thick. There is no trace of any associated structures in the area."
(OSFI:NKB:6.10.1966).
