52 TEXT					

'Centered at NH 660 277 on an E-facing hillside, is a settlement of three stone-walled huts (A-C) each built upon the slope, within a field system.

'Hut 'A' is circular and measures c.10.0m in diameter between the centres of a wall spread to c.2.5m all round. Outer facing stones set on edge are visible in the E and N sides. In the E arc is a mutilated entrance. Within the hut and overlaying the wall to the S of the entrance is a stone clearance heap, c.4.5m in diameter, which is similar to others in the vicinity.

'B' is circular and measures 12.0m in diameter between the centres of a denuded wall

(over)

52 spread to an indefinite width. Outer facing stones can be seen in the S and E arcs and in the E the wall appears to have incorporated a boulder set on the edge, which has since tumbled outwards. In the E arc is a mutilated gap, c.2.0m wide marking the entrance.

'C' is oval and measures c.11.0m ENE-WSW by c. 9.5m transversely between the centres of a denuded wall of indeterminate thickness. On either side of the mutilated entrance, c.2.0m wide, in the ENE arc, the wall is overlaid by two mounds, probably clearance heaps.

'The field system is comprised of stone clearance heaps, lynchets and occasional ruined field walls, defining cultivation plots varying in size between c.4.0m by c.20.0m and c.12.0m b7 c.12.0m.

'Field system delineated on 6" sheet.' (OSFI:NKB:26.3.70)

'Another hut 'D' is visible as a level platform surrounded by an ill-defined wall measuring c.10.5m in diameter between its centres. The entrance is not evident.

'Huts A- D surveyed at 1:2 500.' (OSFI:AA:1.12.71)
