"Centred at NH 697 375, on a S-facing hillside, is a field system which has recently been ploughed through and afforested. It is defined by stone clearance heaps and occasional lynchets. Details of most of the fields have been obscured by the ploughing, but one or two visible as terraces where the slope steepens measure c.25.0m by c.20.0m. No huts are evident." (OSFI:AA:23.4.1970)
