Thanks for the message - I've incorporated your information in the text. The tender details are going to our finance section today and should be issued soon. We are going to ask, AOC, CFA, GUARD and Headland to tender. We feel that Jonathan Wordsworth does not have access to suitable resources for palaeoenvironmental and soil science work to ask him to tender individually, but we would obviously be happy to see him form part of a team put together by one of the other groups.
