"NH 63137176 Cairn (OE) (Remains of)" (1)	
"The remains of a heavily robbed cairn, with surrounding bank. It is situated on the false crest of an east-facing spur in a new forestry plantation. The cairn measures c.10.0m in diameter and 1.0m maximum height; and its S arc is still retained by a kerb of small boulders. It is centrally placed within a circular stony bank 15.5m crest to crest, and 2.0m wide by 0.5m high, which is destroyed on the E side. There is no evidence of an internal ditch, although there is a hollow, probably a later mutilation, in the SE between the cairn and the bank, in which lies a flag-stone." (OSFI:AA:17.9.1967)
