rather than damage - used as a rubbish dump - cairn littered with rusty barbed wire.
More than 2 years ago. SCHEDULED AREA LAND USE = 6 38 UNSCHEDULED
AREA LAND USE = SURROUNDING AREA LAND USE = 6 09 RECORD_DATE
= 19-OCT- 90

The monument has been abused by being used as a rubbish dump; although the coils
rusty wire etc. do not appear to be causing any damage to the cairn, they seriously
detract from its appearance and dignity. Considerable quantities of the cairn material
have been dislodged and are now spread around the rim of the cairn. The monument
stands on the S side of an irregularly fenced field, grazed intermittently by sheep, and
with scattered beech on its N side, and grass and patches of bracken generally.
Adequacy of scheduling cover may depend on whether a kerb is buried under the
surrounding earth; if such is not the case, the cover appears to be adequate.

SEP- 92

There has been no change in the condition of this monument since the first visit two years ago (coils of old rusty wire and other rubbish still blight the monument).

Details of the monument are shown on the accompanying sketch. The considerable quantity of junk on the cairn could be removed by the Warden, if a skip or similar was provided by the owner/occupier - perhaps two hours work. Its condition is unchanged since the previous visit nearly three years ago. Management requirements: Removal of junk, as above.
