

SITE NO: 48
SITE NAME: ALLT CLAIS NAN CAORACH
SITE TYPE: PEATWORKINGS
NGR: NJ 013 141

Remains of several acres of peat extraction. Probably used by inhabitants of Rynettin.

RECOMMENDATIONS: Allow natural regeneration but avoid destroying the pattern of the workings by intensive planting or other activities unless a record is made first.

(Not illustrated)

SITE NO: 49
SITE NAME: ALLT CLAIS NAN CAORACH
SITE TYPE: FIELD SYSTEM
NGR: NJ 0130 1417

Grassy area with signs of possible cultivation rigs. This area corresponds with that shown on Brown's 1858 map as "belonging to Rynettin". It lies adjacent to the above buildings and the grassy vegetation differs sharply from the surrounding heather.

RECOMMENDATIONS: Allow natural regeneration but avoid disturbance that would destroy the overall pattern of the system.
