52 TEXT
 "Hut 'A' - NJ 0836 2085. Hut 'B' - NJ 0841 2086." "Centred at NJ 081 209 on a SSW facing slope at about 1350ft(412.0m) is a field system maked by stone clearance heaps & lynchets. Two typical fields measured about 40.0m x 10.0m and 20.0m x 8.0m. Near the SE end of the system are tow hut platforms (A&B) levelled into the slope with well defined back scarps & stony frontal build-ups. There is no trace of stone walling around them. 'A' measures c.13.0m WNW-ESE by c.12.0m transversely. The surface is a little irregular due to sheep tracks crossing it and uneven peat build-ups. The entrance is not evident. 'B' obscured by deep heather measures c.11.0m WNW-ESE by c.8.0m transversely. Two or three platforms two to three hundred metres to the W, may be denuded hut platforms but soil creep has obscured their outline & they could equally as well be small cultivation plots." (OSFI:AA:28.2.1972)
