

DESCRIPTION:

A rig and foreman plot in roughly rectangular shape, 32m x 42m, situated on a hillside, 21m north of the A82 road. There are 20 rigs placed varying in length from 17m to 42m, varying in width from 1m to 2m, varying in furrow width from 0.5m to 0.6m and varying in wheel length from 1.5m to 2.1m. The rigs run north-south down the slope. The area is overgrown with grass and some bracken and is very overgrown in places making it difficult to identify the outline of the rigs. The south east corner of the rig plot has been eroded away at the boundary of a drainage ditch. A mounded well in a L shape 6m x 7m is located to the south of the rig and foreman plot and adjacent to the drainage ditch.

Cross-Section View.
