Detailed description, further notes, observations – *continued on next page*

While the central, large, upright rock may be natural, the stones around it look as if they have been placed there, particularly the collection of small ones on the north side. The stones have a definite alignment – direction needs to be checked. It might be a marker cairn or a grave.

Present land use

Rough grazing

Past land use

Present vegetation cover

Grass, heather

Nearby monuments or associated features

Topography

Near a cliff, otherwise, low rolling hills

Nearby, associated or incorporated natural features
