Legislation and Policy

The common principles underlying international conventions, national legislation and local authority planning policies are that cultural heritage assets should be identified in advance of development and safeguarded where practicable; if disturbance is unavoidable appropriate recording of features and recovery of portable artefacts should take place. These have been set out in international and European Union agreements, and UK and Scottish legislation, as well as national and local planning policies¹.

Professional standards maintained throughout the present project adhered to the Codes of Conduct and Approved Practice and Standards of the Chartered Institute for Archaeologists².

Acknowledgements

This document was written by Andrew Young MCIfA. The project was commissioned and funded by Blyth and Blyth on behalf of Diageo. Recording work was undertaken by the writer. HAS gratefully acknowledges the assistance given by Diageo development manager, Stephen Corbett, in enabling the successful completion of the survey work.

Background mapping has been reproduced with the permission of the Ordnance Survey under Licence 100043217. Historic mapping is courtesy of the National Library of Scotland.

¹ A summary of relevant international, EU, UK and Scottish legislation and policies is available from the HAS office on request.

² Chartered Institute for Archaeology (CIfA) Standards and Guidelines for Archaeological Excavation.

Location

The study area incorporates the majority of the footprint of the former Clynelish Distillery and lies just to the north of the town of Brora, off Clynelish Road (Figures 1, 2 and 3).

The study area has an overall footprint of approximately 7500 square metres, centred at NGR NC 89717 05488. At the time of the survey the factory was in the process of cleaning and clearance works by owners Diageo.

Introduction

A programme of archaeological photographic recording has been commissioned by Blyth and Blyth in advance of development works by owners Diageo at Brora Old Distillery, the former Clynelish Distillery works, Brora.

The project includes provision to undertake post-fieldwork tasks required for the preparation of this Data Structure Report (DSR).

Archaeological & Historical Background

Historic Environment Record

The Clynelish Old Distillery is a Grade B Listed Building (LB578). The descriptive entry for the Listed complex is as follows:

Description

Dated 1820 and 1896. Distillery complex of two builds, all rubble with tooled dressings. Centre L-plan, 2-storey range with kiln with pyramidal slated roof topped with pagoda cupola vent, in south arm, with mill room, boiler house and still house in long south facing elevation, with tall, later iron banded brick chimney abutting north elevation. Date stone with joint Stafford/Sutherland arms in east gable; bellcote with gilded weather cock at east gable apex. 3 parallel, mainly single storey, ranges, to south, with long elevations facing east/west; 2 ranges comprise bonded warehouses, 3rd includes various stores and former 2-storey, 3-bay house, now converted to industrial use. To east, range of 7 parallel single storey bonded warehouses dated 1896, with long elevations facing north/south, each warehouse becoming progressively shorter in length towards the north, the roughly triangular site being restricted by the Clynelish burn to NE, each gable end becoming more recessed, and stepped along the edge of the burn. Ball finialled gables; West Highland slate roof.

Statement of Special Interest

Founded in 1819 by Sutherland Estate and "erected" for \$750. Enlarged in 1896 by Ainslie and Co. Modern distillery to south of original complex not included in listing.

Historic Maps

The 1st and 2nd Edition Ordnance Survey maps, extracts from which are reproduced below in Figures 5 and 6, show the two principal phases of the development of the Clynelish Distillery complex. In particular they illustrate the substantial phase of extension, rebuilding and reorganisation that took place in the 1890s.

Figure 5 - Extract from the 1st Edition OS 6'' map of 1879. Sutherland XCVIII. Not to scale

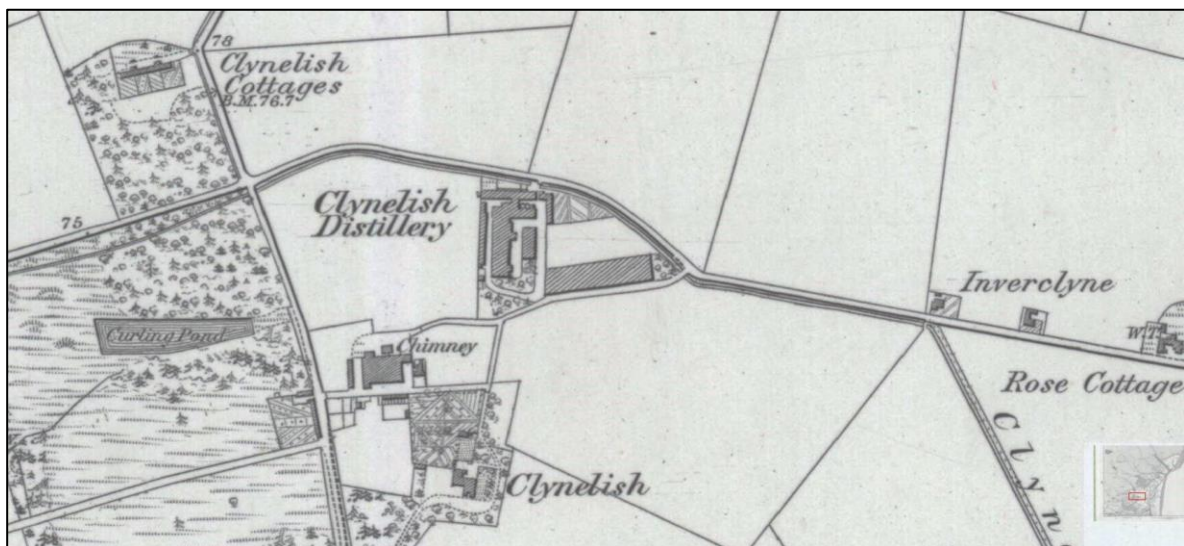

Figure 6 - Extract from the 2nd Edition OS 6'' map of 1909. Sutherland XCVIII. Not to scale

Statistical Accounts

The Statistical Accounts for Scotland were not consulted for the present study.

Photographic Recording

Aims and Objectives

The principal aim of the photographic recording was to:

- Produce a comprehensive photographic record of the Clynelish Old Distillery works in their present condition and before major refurbishment and upgrading works.

Methodology

A comprehensive Level 1 photographic record was made of the Old Distillery buildings (Figure 4), both externally and internally. The block of storage warehouses currently in use were excluded, as were certain parts of the factory complex including some parts of uppermost floors, which were deemed unsafe by the Principal Contractor.

Exterior images were related to recorded *Camera Points* (see Appendix 1) whilst the interior of individual rooms or structures were recorded by room name or designation.

Images were taken in colour using a Pentax K50 16MP camera.

Buildings, Rooms and Structures

The following photographs are selected from the overall photographic archive as representative of the buildings, structures and features present on site.

The Cooperage Building (Figure 4)

Discussion & Conclusions

The buildings and structures of the former Clynelish Distillery works, also termed the Old Brora Distillery, have been recorded by means of a basic photographic survey in advance of proposed renovations and refurbishment works by the owners, Diageo.
